

HortiBoost

Complete Plant Biostimulant and Nutrient Complex.

HortiBoost takes plant nutrition beyond conventional fertilisers by combining a unique, powerful package of 20 essential amino-acids, Humic and Fulvic Acid Complex, Seaweed and major and minor nutrients from both organic and inorganic sources.

Analysis (w/w)

20 L-form Amino acids package	5.00%
Magnesium (MgO)	0.09%
Boron (B)	0.027%
Copper (Cu)	0.036%
Iron (Fe)	1.10%
Manganese (Mn)	0.036%
Molybdenum (Mo)	0.018%
Zinc (Zn)	0.036%
Seaweed Extract	5.00%
Humic Acid Complex	0.60%
Total Nitrogen	1.48%
Phosphorus (P ₂ O ₅)	0.34%
Potassium (K ₂ O)	0.97%

Benefits

- Fast-acting with absorption into the crop within 12 to 24 hours.
- HortiBoost facilitates maximum utilisation of nutrients, water, CO₂ and light, to maximise growth efficiency
- Primarily foliar applied, but can be applied via fertigation systems for salad and soft fruit crops
- Can be used alone as a biostimulant or tank mixed with a wide range of Hortifeeds soluble fertilisers and HortiPhyte products

Main Uses

- Use to boost vegetative growth and early fruit swell stages for fruit crops and in early and mid-growth stages for vegetables, salads and ornamentals.
- Ideal for constant drip application at low rates mixed with mineral fertiliser to boost root development and plant growth.
- Apply before and after any stress situation to help the crop prepare to and recovery from stress (frost, drought, wind, etc).
