

HortiBoost

Application Rate:

10 to 20 litres/ha depending on crop size. Dilute into 200 to 600 litres of water/ha.
As an addition to foliar fertilisers and HortiPhyte apply at 5 to 10 litres/ha in 200 to 600 litres of water.
To be used only where there is a recognised need. Do not exceed recommended application rate.

Application Timing:

HortiBoost is intended for use in the vegetative and early fruit swell stages of fruit crops and in the early and mid-growth stage of vegetables. Salads and ornamentals.

Application Frequency:

Apply at 14-28 day intervals according to the crops' need.

Tank Mixing:

Can be added (tank mixed) with NPK foliar fertiliser sprays and with HortiPhyte.

Conditions of Supply:

All goods supplied by us are of a high quality and we believe them to be suitable, but as we cannot exercise control over their storage, handling, mixing or use or of the weather conditions before, during or after application which may affect the performance of the goods, all conditions and warranties, statutory or otherwise, as to the quality or fitness for any purpose of our goods are excluded and no responsibility will be accepted by us or re-sellers for any failure in performance, damage or injury whatsoever arising from their storage, handling, application or use. These conditions cannot be varied by our staff or agents whether or not they supervise or assist in the use of such goods.
